# Towards the Development of the Multilingual Multimodal Virtual Agent

INESE VĪRA, JĀNIS TESEĻSKIS, INGUNA SKADIŅA {INESE.VIRA; JANIS.TESELSKIS; INGUNA.SKADINA}@TILDE.LV **WWW.TILDE.COM** 

# The concept

Goal: to develop multilingual and multimodal agent.

#### First steps towards the goal:

- ✓ attractive 3D multimodal virtual agent Laura;
- √ freely talking with natural mimics, synchronous lip movements and emotions;
- ✓ can answer questions and handle simple dialog based on AIML;
- √ translates phrases and sentences from English to French, Russian and Spanish.

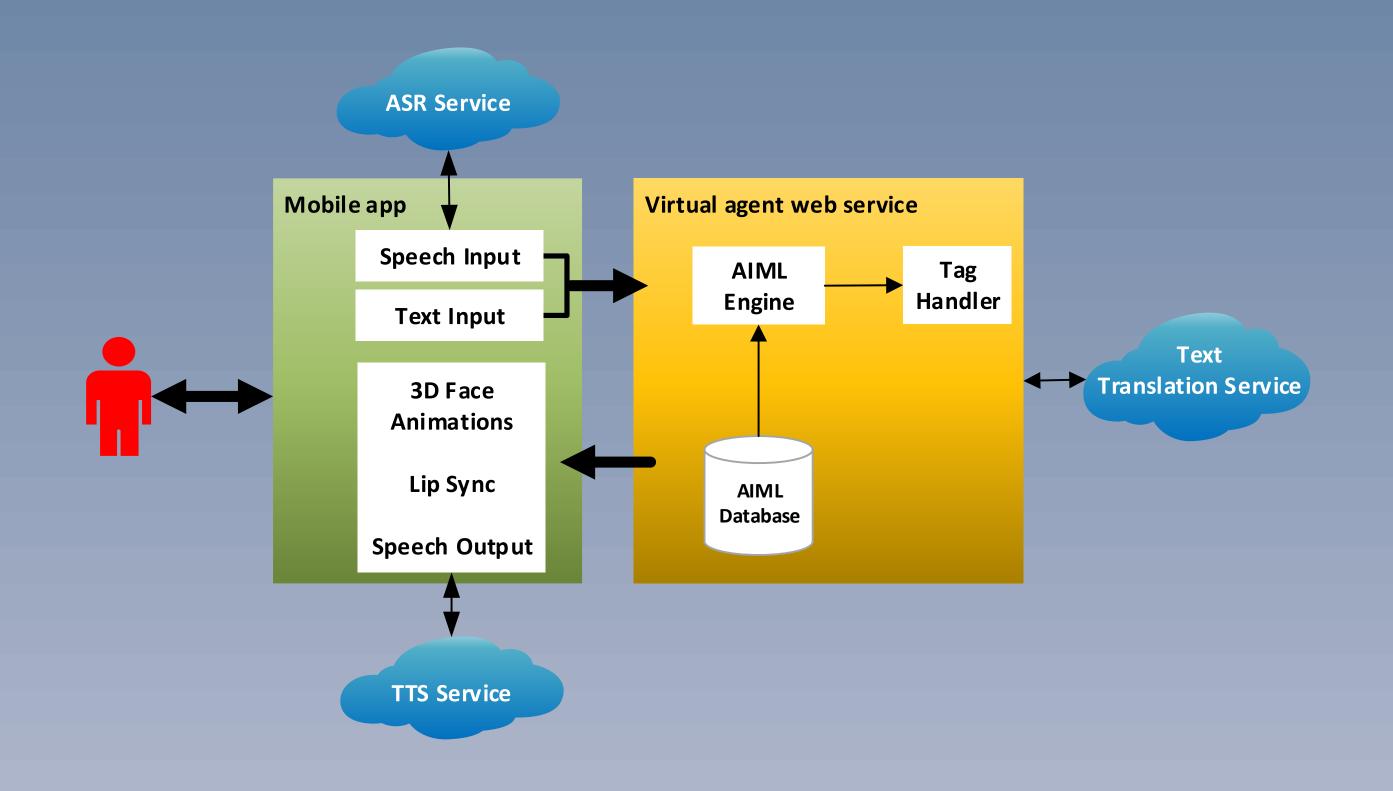

#### **Next steps:**

- to extend the functionality to allow dialog and question answering in several languages;
- →emotion recognition;
- >emotional response when speaking about certain topics;
- →to work on fusion and fission.

## Design of the System

- I. Mobile application (implemented using Unity game engine)
- II. Virtual agent web service responsible for intelligent conversation between the agent and the user (AIML)
- III. Automatic speech recognition (ASR) service used for voice input
- IV. Text translation service for translation of the user's queries
- V. Speech synthesis service (TTS) used for speech output

## **Translation**

<category><pattern>**TRANSLATE** \* **TO** \*</pattern><template>

<think> <set name="topic">translate</set> <set name="text"><star index="2"/></set> <set name="language"><star index="1"/></set> </think><srai>TRANSLATEANSWERS </template></category> <topic name="translate"> <category><pattern>**TRANSLATEANSWERS**</pattern><template> <random> I think it is <translate lang="<get name="language"/>"&gt; <get name="text"/>&lt;/translate&gt;

< translate lang="<get name="language"/>"&gt;

<get name="text"/> &lt;/translate&gt; I guess.

</random>

</template></category></topic>

### **Translate cat into French**

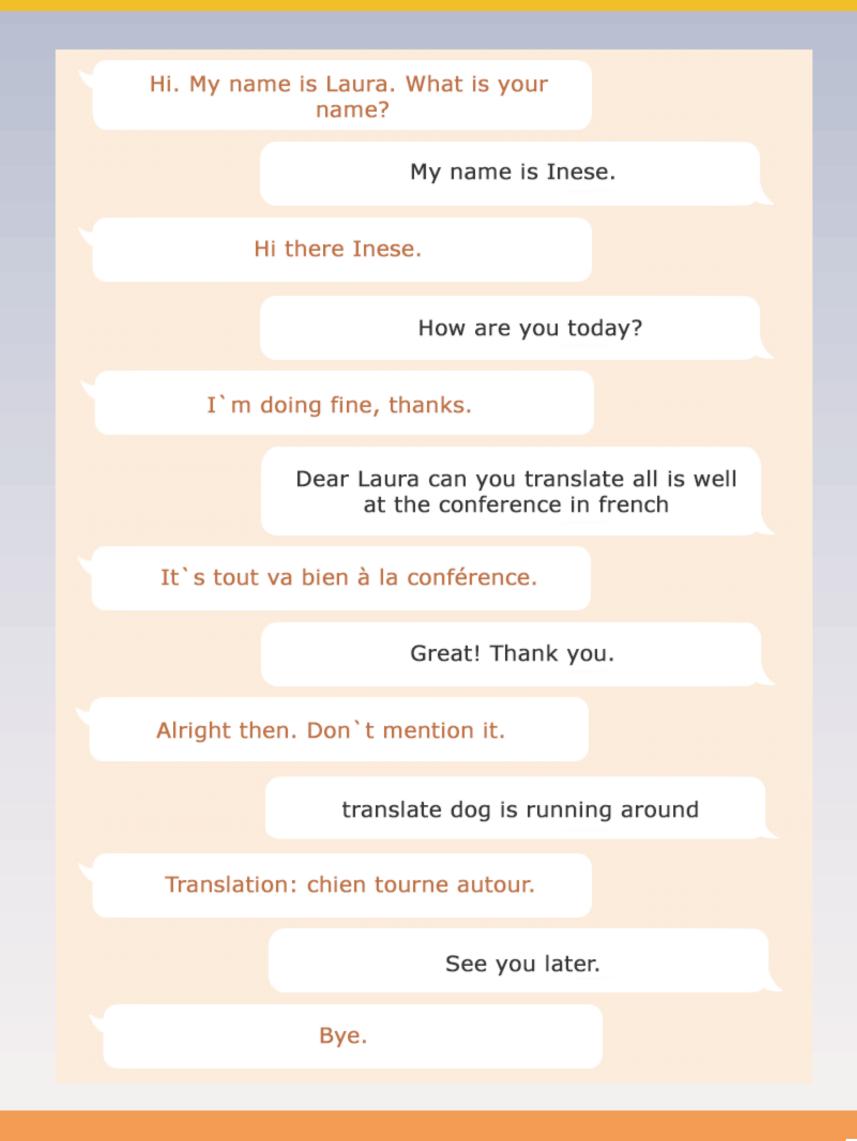

< translate lang="french">cat</translate>

Dear Laura could you please translate today is a lovely day in Spanish

<translate lang="spanish">today is a lovely day

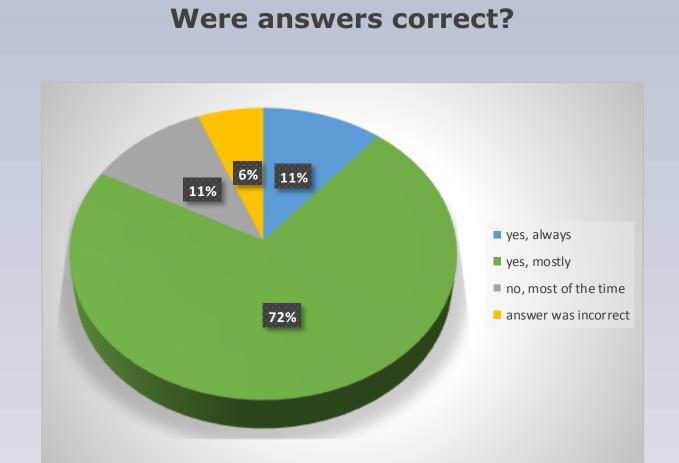

Please translate dog. / remembers the previous language/ <translate lang="spanish">dog</translate>

# Demonstration

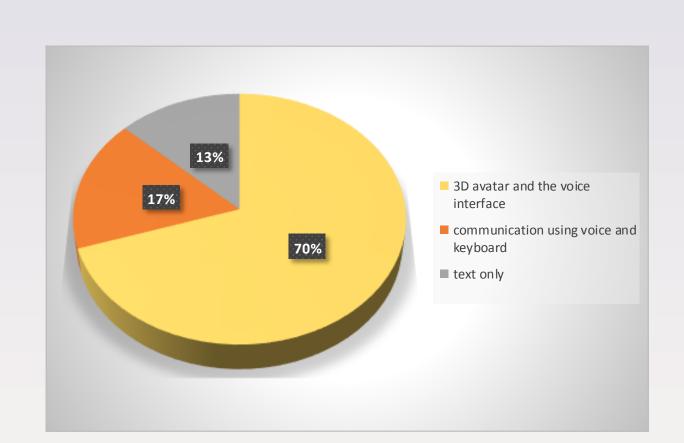

# Evaluation

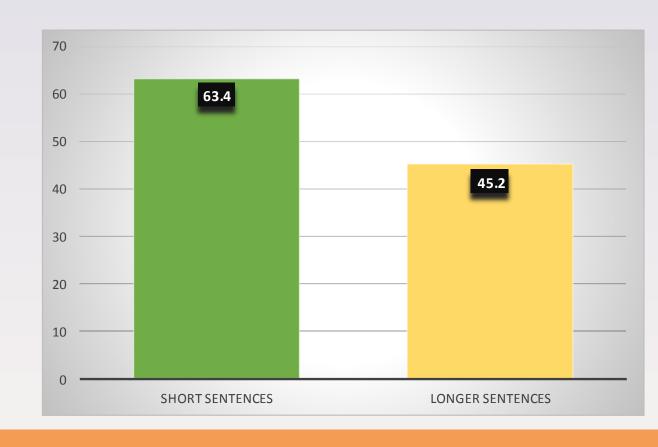

**How often did Laura correctly understand** the question, phrase, or sentence as the one that needs to be translated? ■ long sentences ■ short sentences

Which modality would you prefer?

**ASR** quality

## Acknowledgements

The research leading to these results has received funding from the research project "Information and Communication Technology Competence Center" of EU Structural funds, contract nr. L-KC-11-0003 signed between ICT Competence Centre and Investment and Development Agency of Latvia, research No. 2.1 "Natural language processing in mobile devices".
